## Year 9 – ‘ComputerScienceUK’ Curriculum Map

Autumn Term		Spring Term		Summer Term	
Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
<b>Key Themes</b>	<b>Key Themes</b>	<b>Key Themes</b>	<b>Key Themes</b>	<b>Key Themes</b>	<b>Key Themes</b>
Python Programming  Review of Year 8: - Outputs - Inputs and Variable Storage - IF Statements Advancing Knowledge: - FOR Loops - WHILE Loops  Problem Solving (Abstraction and Decomposition) Tasks	Back to the Future  Visiting famous CS pioneers and exploring their work: - George Boole – Boolean Logic - Tim Berners-Lee – HTML and WWW - Charles Babbage – The Difference Engine and Problem Solving - Alan Turing – Code Breaking	Computer Networks  - Advantages / Disadvantages of Networks - Local Area Networks (definition and hardware required) - Wide Area Networks (definition and hardware required) - Data Packets and the Internet - DNS and the Internet	HTML, CSS and JavaScript  TBC	Scrolling Game Maker  - Designing Interfaces, Gameplay (and progression) and Algorithms - Code Development, Alpha Testing and Debugging - End-User Testing and Evaluations	
<b>Assessment</b>	<b>Assessment</b>	<b>Assessment</b>	<b>Assessment</b>	<b>Assessment</b>	<b>Assessment</b>
A written assessment made up of exam style questions covering the all aspects of the unit.  This will be carried out at the end of the unit (approx. at the end of the half-term).	A written assessment made up of exam style questions covering the all aspects of the unit.  This will be carried out at the end of the unit (approx. at the end of the half-term).	A written assessment made up of exam style questions covering the all aspects of the unit.  This will be carried out at the end of the unit (approx. at the end of the half-term).	A written assessment made up of exam style questions covering the theoretical aspects of the unit (to be carried out at the end of the unit)  In addition to this there will be an extended project, assessing the use of the practical HTML skills taught on the course. This will be an ongoing assessment throughout the second half of the unit.	An extended project assessing the full development process of coding a computer game: - Design - Development - Testing - Evaluation  A good piece of work should include detailed design work, efficient coding (with few bugs), evidence of testing with resulting improvements documented and a detailed evaluation of the success of the project.
